12. Precaution For Use

1) Storage

In order to avoid the absorption of moisture, it is recommended to store in a dry box (or a desiccator) with a desiccant. Otherwise, to store them in the following environment is recommended.

Temperature : 5 °C ~ 30 °C Humidity : maxim 65%RH

2) Attention after open.

LED is correspond to SMD, when LED be soldered dip, interfacial separation may affect the light transmission efficiency, causing the light intensity to drop. Attention in followed;

a. After opened and mounted the soldering shall be quickly.

b. Keeping of a fraction

Temperature : 5 ~ 40 °C Humidity : less than 30%

3) It is recommended that user should complete the use of the whole package within 48 hours upon unsealing. In the event of incomplete usage, It is advised that user preheat the remaining devices at 60±5 °C for 10-12hours prior to use.

4) Any mechanical force or any excess vibration shall not be accepted to apply during cooling process to normal temperature after soldering.

5) Quick cooling shall be avoided.

6) Components shall not be mounted on wrapped direction of PCB.

7) Anti radioactive ray design is not considered for the products.

8) This device should not be used in any type of fluid such as water, oil, organic solvent, etc. When washing is required, IPA should be used.

9) When the LEDs are illuminating, operating current should be decided after considering the ambient maximum temperature.

10) LEDs must be stored to maintain a clean atmosphere.

If the LEDs are stored for 3months or more after being shipped from CIEL LIGHT, a sealed container with a nitrogen atmosphere should be used for storage.

11) The LEDs must be used within one day after opening the moisture proof packing. Repack unused products with anti-moisture packing, fold to close any opening and then store in a dry place

12) Repack unused products with one day after opening the moisture-proof packing.

13) The appearance and specifications of the product may be modified for improvement without notice.
