

**Ciel Light**

## Data Sheet

---

Customer: \_\_\_\_\_  
Part No: CL-SFC506UV-400-01  
Sample No: \_\_\_\_\_  
Description: 5050 SMD 400nm UVA  
Item No: \_\_\_\_\_

| Customer |            |          |      |
|----------|------------|----------|------|
| Check    | Inspection | Approval | Date |
|          |            |          |      |

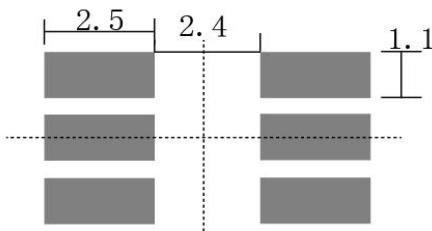

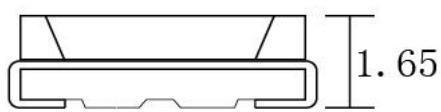

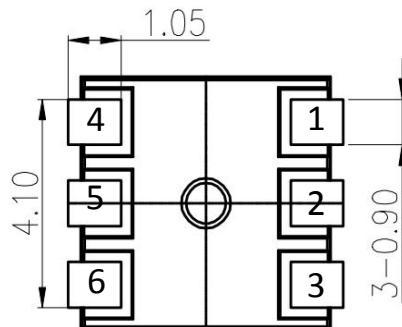

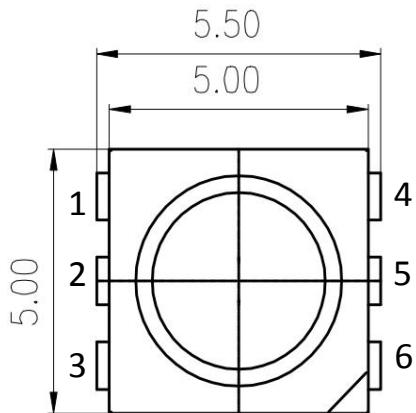

## Features:

- . Reflow Solderable
- . High Luminous Intensity and Low Power Dissipation
- . Good Reliability and Long Life
- . Complied With RoHS Directive

## Applications

- Optical indicator
- Indoor display
- Backlighting in dashboard and switch
- Flat backlighting for LCD, symbol and display
- General use

### Notes:

- 1 . All dimension units are millimeters.
2. All dimension tolerance is  $\pm 0.2\text{mm}$  unless otherwise noted.

## Selection Guide

| Part No.           | Chip Materials  | Lens Type   | Radiant Flux(mW) |     |     | Viewing Angle |
|--------------------|-----------------|-------------|------------------|-----|-----|---------------|
|                    |                 |             | Min              | Typ | Max |               |
| CL-SFC506UV-400-01 | Purple (InGaN ) | Water Clear | 170              | --  | 230 | 201/2         |

Note:

1.1/2 is the angle from optical centerline where the luminous intensity is 1/2 the optical centerline value.

2.the above luminous intensity measurement allowance tolerance ±10%

2.30LM above Products lumens allow differences:±1LM

## Electrical / Optical Characteristics at Ta=25°C

| Parameter       | Symbol | Min. | Typ. | Max | Units | test conditions |
|-----------------|--------|------|------|-----|-------|-----------------|
| Forward Voltage | VF     | 2.8  | --   | 3.5 | V     | IF=60mA         |
| Reverse Current | IR     | --   | --   | 10  | uA    | VR = 5V         |
| Peak Wavelength | λP     | 400  | --   | 405 | nm    | IF=60mA         |

## Absolute Maximum Ratings at Ta=25°C

| Parameter                | Symbol | Rating   | Units |
|--------------------------|--------|----------|-------|
| Power Dissipation        | Pd     | 210      | mW    |
| DC Forward Current       | IF     | 60       | mA    |
| Peak Forward Current [1] | IFP    | 150      | mA    |
| Reverse Voltage          | VR     | 5        | V     |
| Operating Temperature    | Topr   | -40~+85  | °C    |
| Storage Temperature      | Tstg   | -40~+100 | °C    |

Note:

- 1/10 Dut cycle,0.1ms pulse width.
- The above forward voltage measurement allowance tolerance ±0.1V.
- The tolerance of wave length:±1nm.

**IV Spec. Table**

| Radiant Flux |     |     |      |      |
|--------------|-----|-----|------|------|
| BIN CODE     | MIN | MAX | Unit | IF   |
| 1            | 170 | 190 | mW   | 60mA |
| 2            | 190 | 210 |      |      |
| 3            | 210 | 230 |      |      |

Tolerance on each Intensity bin is: +/-15%

**VF Spec. Table**

| Forward Voltage(VF) |     |     |      |      |
|---------------------|-----|-----|------|------|
| BIN CODE            | MIN | MAX | Unit | IF   |
| VD1                 | 2.8 | 2.9 | V    | 60mA |
| VD2                 | 2.9 | 3.0 |      |      |
| VD3                 | 3.0 | 3.1 |      |      |
| VD4                 | 3.1 | 3.2 |      |      |
| VE1                 | 3.2 | 3.3 |      |      |
| VE2                 | 3.3 | 3.4 |      |      |
| VE3                 | 3.4 | 3.5 |      |      |

Tolerance on each Forward Voltage bin is: +/-0.1V

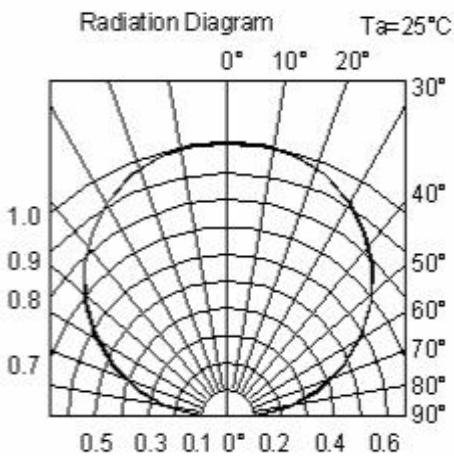

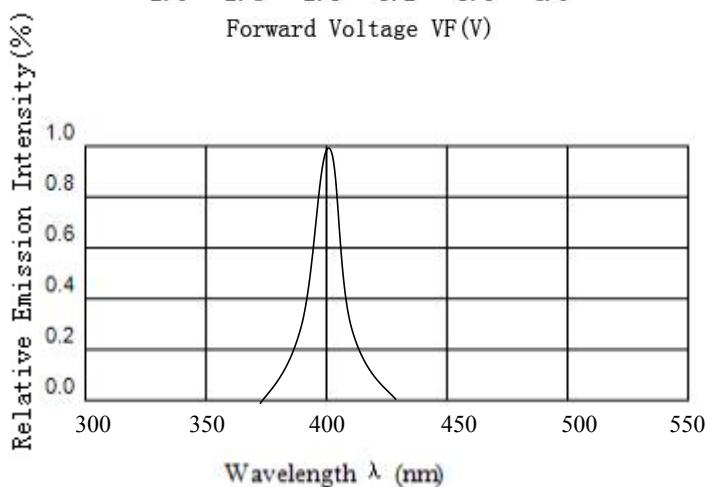

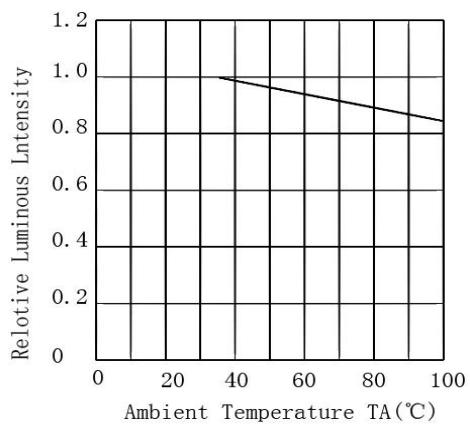

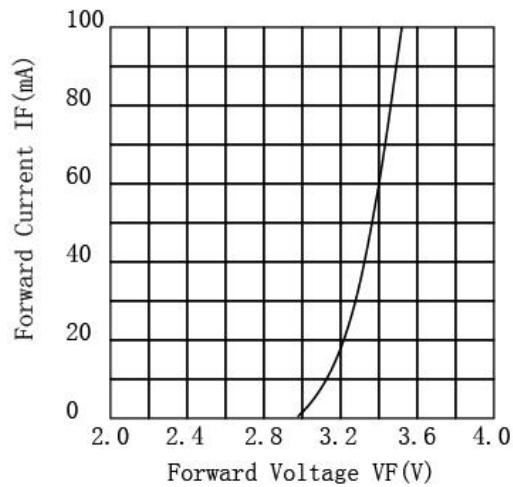

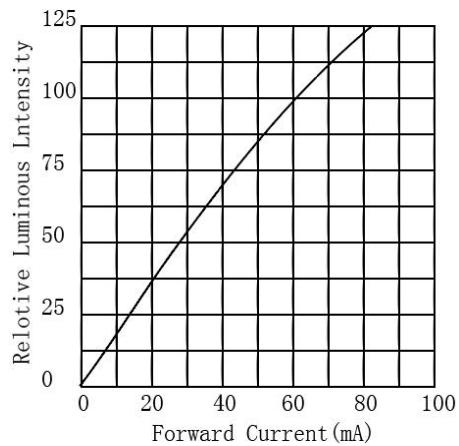

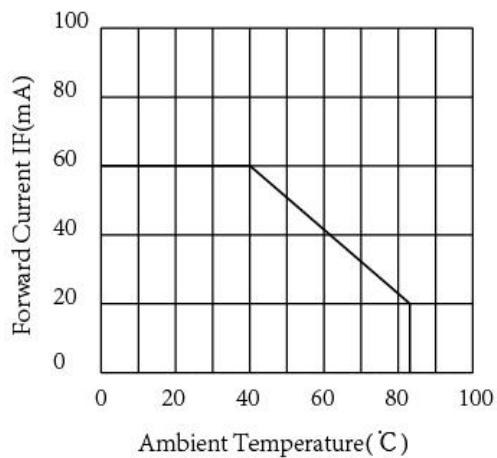

**Dominant Wavelength(Hue)**

| BIN CODE | MIN | MAX | Unit | IF   |
|----------|-----|-----|------|------|
| PB2      | 400 | 405 | nm   | 60mA |

Tolerance for each Dominant Wavelength bin is: +/- 1nm

### Typical optical characteristics curves

Ambient Temperature VS. Forward Current

## Reliability Test Items And Conditions

| Test Items  | Ref.Standard | Test conditions                                   | Time       | Quantity | Ac/Re |
|---|--------------|---|------------|----------|-------|
| Reflow Soldering                                      | JESD22-B106  | Temp.:260°C±5°C<br>Min.5sec.                      | 3 times.   | 22Pcs.   | 0/1   |
| Temperature Cycle                                     | JESD22-A104  | 100°C±5°C 30 min.<br>↑↓5 min<br>-40°C±5°C 30 min. | 100 Cycles | 22Pcs.   | 0/1   |
| High Temperature Storage                              | JESD22-A103  | Temp:100°C±5°C                                    | 1000Hrs    | 22Pcs.   | 0/1   |
| Low Temperature Storage                               | JESD22-A119  | Temp:-40°C±5°C                                    | 1000Hrs    | 22Pcs.   | 0/1   |
| Life Test   | JESD22-A108  | Ta=25°C±5°C IF=60mA                               | 1000Hrs    | 22Pcs.   | 0/1   |
| High temperature and high humidity storage experiment | JESD22-A101  | 85°C±5°C/ 85%RH                                   | 1000Hrs    | 22Pcs.   | 0/1   |

## Criteria For Judging Damage

| Test Items         | Symbol | Test conditions | Criteria For Judgement |             |
|--------------------|--------|-----------------|------------------------|-------------|
|                    |        |                 | Min.                   | Max.        |
| Forward Voltage    | VF     | IF=60mA         |                        | U.S.L*)x1.1 |
| Reverse Current    | IR     | VR = 5V         |                        | U.S.L*)x2.0 |
| Luminous intensity | IV     | IF=60mA         | L.S.L*)x0.7            |             |

U.S.L: Upper standard level

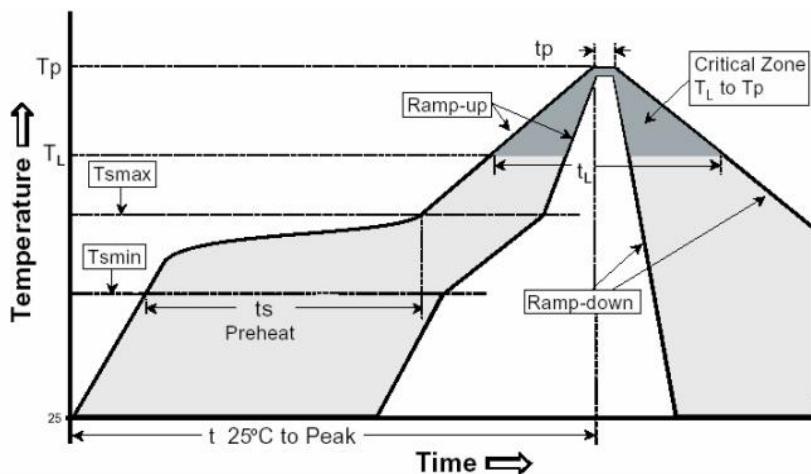

L.S.L: Lower standard level

The technical information shown in the data sheets are limited to the typical characteristics and circuit examples of the referenced products. It does not constitute the warranting of industrial property nor the granting of any license.

## SMT Reflow Soldering Instructions

1. The number of reflow soldering shall not exceed two times, and the time from the second processing to the first completion shall not exceed 24H
2. When soldering, do not put stress on the LEDs during heating.
3. Reflow temperature distribution (Acc.to J-STD-020D)

| Profile Feature                                 | Sn-Pb Eutectic Assembly |               | Pb-Free Assembly |               |
|---|-------------------------|---------------|------------------|---------------|
|   | Large Body              | Small Body    | Large Body       | Small Body    |
| Average ramp-up rate (TL to Tp)                 | 3 °C/second max.        |               | 3 °C/second max. |               |
| Preheat   |                         |               |                  |               |
| -Temperature Min(TSmin)                         | 100°C                   |               | 150°C            |               |
| -Temperature Max(TSmax)                         | 150°C                   |               | 200°C            |               |
| -Time(min to max)(ts)                           | 60-120 seconds          |               | 60-180 seconds   |               |
| Tsmax to TL                                     |                         |               | 3 °C/second max. |               |
| -Ramp-up Rate                                   |                         |               |                  |               |
| Time maintained above:                          |                         |               |                  |               |
| -Temperature(TL)                                | 183°C                   |               | 217°C            |               |

| Peak Temperature(Tp)                            | 225+0/-5°C              | 240+0/-5°C    | 245+0/-5°C       | 260+0/-5°C    |
| Time within 5 °C of actual Peak Temperature(tp) | 10-30 seconds           | 10-30 seconds | 10-30 seconds    | 20-40 seconds |
| Ramp-down Rate                                  | 6 °C/second max.        |               | 6 °C/second max. |               |
| Time 25 °C to Peak Temperatur                   | 6 minutes max.          |               | 8 minutes max.   |               |

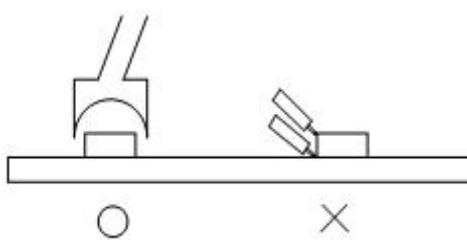

## Soldering iron

1. When hand soldering, the temperature of the iron must less than 350°C for 3 seconds
2. The hand solder should be done only one times

## Repairing

Repair should not be done after the LEDs have been soldered. When repairing is unavoidable, a double-head soldering iron should be used(as below figure). It should be confirmed in advance whether the characteristics of LEDs will or will not be damaged by repairing.

## Storage

This product uses sealing anti-moisture antistatic packaging, and with desiccant, humidity card.

### Before packaging is opened:

1. The storage environment is: the ambient temperature should be maintained between 5 °C and 30 °C, and the relative humidity should be kept within 60% RH. (The storage period is 2 months. If more than two months, please return the product to our company to help dehumidify)
2. Please check the package for leaks before opening. If there is a leak, return to the factory for dehumidification.

### After opening the package:

1. After opening the package, check whether the humidity card has a discoloration phenomenon. Please remove the material from the bag and use it after dehumidifying 24H at 65 °C.
2. Environmental conditions: The ambient temperature should be kept between ≤ 30 °C and relative humidity The lower 60 % RH should be maintained.
3. if the material is not produced after exposure in the workshop for more than 24 hours, the product must be put back in the oven, dehumidified with 65 °C 24H, and then can be used again. If the material is not produced after 48 hours of exposure in the workshop, return the material to the SMD plant for high temperature dehumidification.
4. When the material is dehumidified, please do not open the oven in the middle, so that the oven temperature will not drop to the dehumidification effect.

**Please refer to the following operating methods when the material needs to be dehumidified**

**Correct way: material desiccant need to remove the bag, use the way of hanging baked**  
正确的方法：材料需要去掉袋子，使用挂烤的方式烘烤。

**Wrong way: the material is dehumidified without removing the bag, in a stacking manner**  
错误的做法是：以堆叠方式或材料不取出袋子烘烤。

## ESD

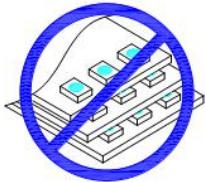

Static Electricity will damage the LED.

The following steps can reduce the likelihood of ESD causing product damage

1. All productive machinery and test instruments must be electrically grounded.
2. Use a conductive wrist band or anti-electrostatic glove when handling these LEDs.
3. Maintain a humidity level of 50%RH or higher in production areas.
4. Use anti-static packaging for transport and storage.

## Handling Precautions

1. Do not stack the assembled PCB together. This may scratch the surface of the product or damage the circuit.

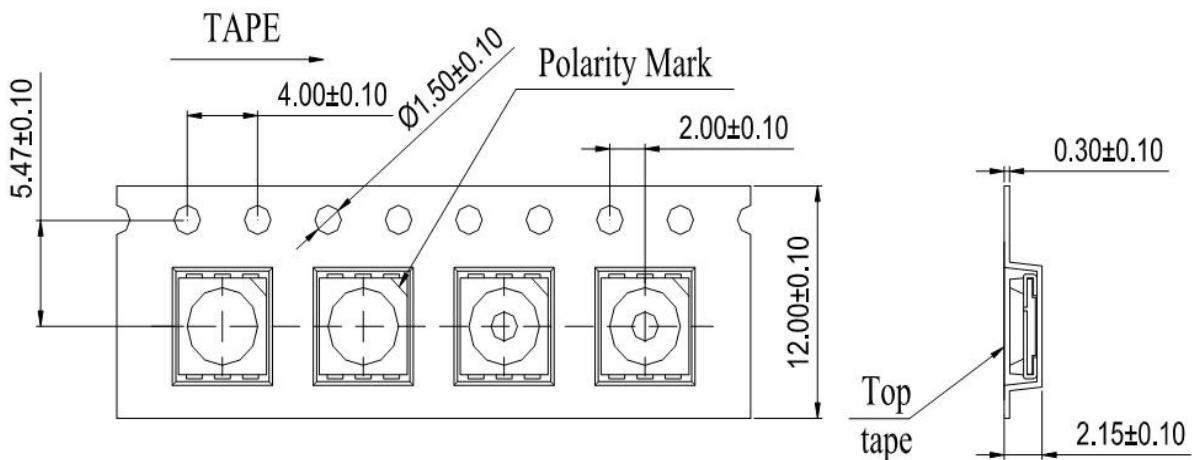

2. Not available in the situation of acidity for PH.

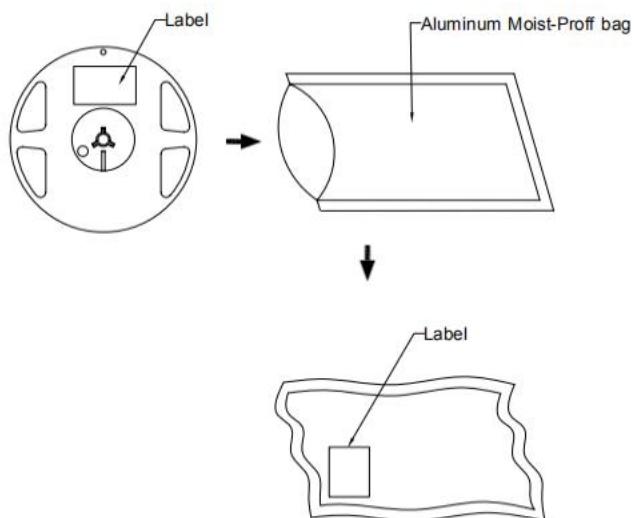

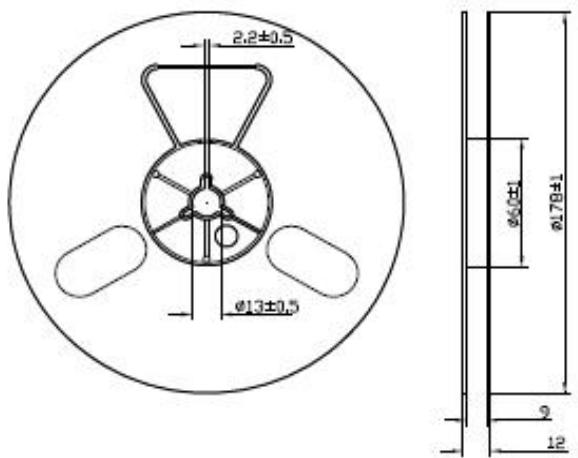

3. Electrostatic sensitive device

**Package: 1000pcs/reel**

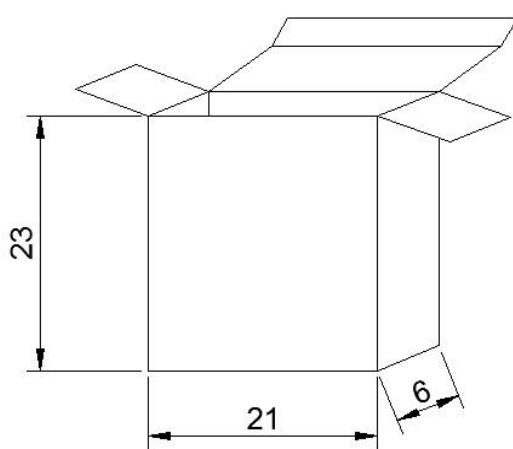

### Moisture Resistant Packaging

### Cardboard Box

Maximum packing quantity (5 packs of material)

Maximum packing quantity (27 bags of material or 5 small boxes)
